EXPERIENCE

Product Development Manager

Datafy

Ogden, UT

March 2021 - Present

- Architected and built data visualization application including ETL pipelines, data models, API, and React SPA
- Hired, trained, and led a growing team of software engineers to develop and maintain the application
- Researched and implemented industry-best practices in software development and technical management
- Planned, developed, and maintained new versions and features of Tableau-based data visualization product
- Created new data models and ETL processes, built out documentation, and streamlined workflows

Data Management Consultant

Canyon Grove Academy

American Fork, UT

December 2020 - December 2021

- Planned and led the restructuring of key data to create new opportunities for data analysis and reporting
- Documented, streamlined, and produced training material for data management processes across the organization
- Performed a comprehensive analysis of curricula and test scores and delivered data visuals and recommendations

Business Intelligence Intern

The Church of Jesus Christ of Latter-day Saints

Riverton, UT

May 2020 - August 2020

- Researched, tested, and then trained employees on new data analytics and data engineering software features
- Built custom database version control and testing processes using a variety of cloud platforms and technologies
- Wrote extensive documentation for the new database management tools, then gave trainings and guidance as employees implemented the tools and processes on production servers
